The National Center for Medical Rehabilitation Research Classification Scheme for Disability Terminology

Disablement and Physical Therapy

Disablement and Documentation

Summary

### CHAPTER OBJECTIVES

Upon completion of this chapter, the reader will be able to:

1. Compare and contrast historical and contemporary disablement models.
2. Discuss the need for standard disablement concepts in patient care, health policy, and research.
3. List 3 disablement frameworks, or models.
4. Compare and contrast ICF and Nagi framework terminology.
5. Differentiate between body functions/structures, activities and participation, and contextual factors.
6. Differentiate between positive factors and negative factors.
7. Describe the components and purpose of the WHO-FIC.
8. Describe core set and its application for physical therapists.
9. Examine the integration of disablement in physical therapy practice.
10. List ways to integrate disablement concepts into documentation.
